查看

使用nmcli工具来列出所有连接

```
nmcli con show
```

```
root@localhost:~# nmcli con show
NAME                UUID                                  TYPE    DEVICE
Wired connection 2  36d2bb06-237b-3433-b47e-91325d2dfb18  ethe
rnet  eth0
```

我这里是"Wired connection 2"

设置静态IP地址

```
sudo nmcli connection modify "Wired connection 2" ipv4.addresses 192.168.1.200/24
sudo nmcli connection modify "Wired connection 2" ipv4.method manual
```

重启网络连接

```
sudo nmcli connection down "Wired connection 2" && sudo nmcli connection up "Wired
connection 2"
```
